PROFILE

MSc Data Science and AI student at the University of Liverpool. Builds and evaluates machine-learning workflows in 3D computer vision, forecasting and data analysis. Seeking graduate and junior roles in machine learning, applied AI and data science.

TECH STACK

Python, SQL, R, pandas, NumPy, DuckDB, GeoPandas, QGIS, spatial statistics, cartography.

Git, pytest, Docker, GitHub Actions, Linux/HPC, SLURM, command-line tools.

ANALYTICS / ML

scikit-learn, PyTorch, statistical modelling, chronological evaluation. Computer vision, forecasting, transfer learning, model comparison, data quality and spatial analysis.

SELECTED PROJECTS

Benchmarking six methods for 3D tree segmentation

MSc dissertation

Built the integration and evaluation workflow around six author-released tree-segmentation methods. Six methods compared across 11 held-out plots, 323 reference trees and 49.7 million points.

Leakage-aware next-gameweek forecasting

Independent project

Built a Python forecasting package with time-aware features, chronological evaluation, DuckDB storage and a read-only local API. Ridge MAE: 1.110 points versus 1.130 for the three-observation mean baseline, across GW6–15 of 2024–25.

Liverpool workplace-flow analysis

Independent rebuild

Rebuilt a spatial analysis pipeline with DuckDB, Python and independent numerical checks in R. 84,567 of 123,689 included fixed-workplace flows remained within Liverpool: 68.37%.

EDUCATION

MSc Data Science & Artificial Intelligence | University of Liverpool

September 2025 – September 2026 (expected)

BSc Geography | University of Liverpool

Completed June 2025 · Upper Second-Class Honours

ADDITIONAL EXPERIENCE

Fosse Meadows | Food Production Operative and Market Assistant | June – September 2025

Worked in a two-person market team, serving customers, handling payments and preparing wholesale and commercial orders to same-day deadlines.

Whistl | Warehouse Operative | June – August 2023

Used handheld scanners to pick, pack and prepare high-volume orders for distribution, meeting productivity targets.
